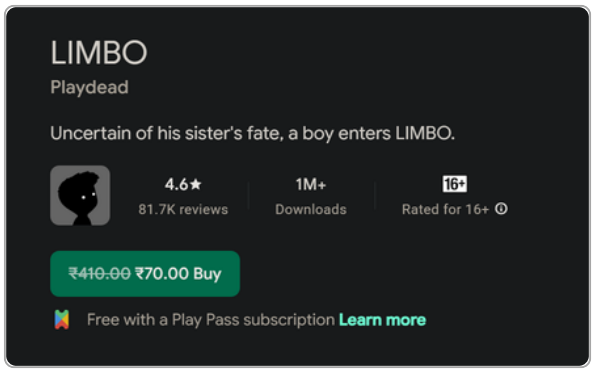
MY CATEGORIZED GAME COLLECTION

This is a curated list of games I've personally enjoyed, organized into categories to make it easier to explore. It includes a mix of free and paid titles (with estimated pricing), but keep in mind that prices can vary across platforms; so it's always worth checking alternatives like the Epic Games Store or other app stores for better deals.

A few quick tips before you dive in:

- Some free games can be heavy on ads; **using a private DNS can help reduce interruptions.**
- If you're on Android, **Google Play Pass (₹99/month)** is surprisingly good value; it removes ads, unlocks premium features, and even includes some in-app purchases for free.
- Costs mentioned here are estimated, so **double-check before deciding.**

This list has around **100–150 games** I could recall, ranging from hidden gems to well-known favorites; all organized to help you find something you'll enjoy.



Also, keep an eye out for seasonal sales and limited-time discounts—many paid games drop heavily in price during special events.

If you play on PC as well, Epic Games Store regularly gives away free games every week, which is a great way to build a library without spending anything.

MORE GAMES I LOVED

This is more of an **extended collection;** a mix of additional favorites, older games I used to play a lot, and some great titles I initially missed in Part 1. I went back through my library and added everything that still felt worth recommending.

Unlike the first list, this one isn't deeply categorized. Instead, it's split loosely into **"gems"** and **"the rest,"** since the collection is much larger and more varied. You'll find both popular and lesser-known games here; although I've skipped a few ultra-mainstream ones (like the obvious big names) unless I personally enjoyed them a lot.

There's **no pricing or tagging this time ;** just a straightforward list. If something catches your eye, check it out and see if it fits your style.
