

2x2 Beginners

By Kunal Oak

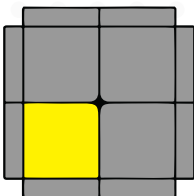

Corner Orientation

If a corner is oriented correctly, it means that the Top Layer color is facing up.

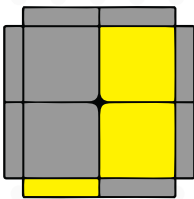

1. On the front left corner, Top layer color should be facing left.

Sune Algorithm : **R U R' U R U2 R'** -> Reduces to 1 corner case

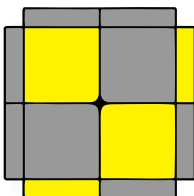

2. One top layer corner is oriented correctly (Hold corner on bottom left as given in image)

Sune Algorithm : **R U R' U R U2 R'**

3. On the front left corner, Top layer color should be facing front.

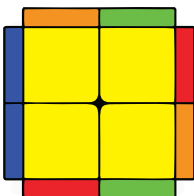

Sune Algorithm : **R U R' U R U2 R'** -> Reduces to 1 corner case

Corner Permutation

2 Corners Solved

T-perm : **R U R' U' R' F R2 U' R' U' R U R' F'**
(Hold solved corners on left)

No Corners Solved

T-perm : **R U R' U' R' F R2 U' R' U' R U R' F'** -> Reduces to 2 corner solved case (In any orientation)
